Design Projects

Taxxly

Founder, Developer & Designer

Designed and developed a local tax guide and calculation site to make the tax process easier for Individuals and small businesses. I user tested the design and made alterations to it based of the user feedback. Designed a responsive Ad system and intergrated ads onto the product.

Goalie

Founder, Developer & Designer

I designed a goal tracker app in Figma which I am developing . The design was based of paper wireframes I had made using a mix of a human centered design approach and an optimised version of the Google design sprint process to come up with a design that is easy to understand & functional.

ProWorkFit

Contractor

Designed and prototyped a fitness product based on the business plan and strategy I had developed with the client.

Bax Studios

Contractor

Worked closely with a client to Develop and Design a website to market their business, showcase their diverse portfolio of work and clients and promote their upcoming release.

About Me

I'm a lover of powerful, elegant, and impactful design. I'm always up for challenging work that provides the opportunity to positively affect people on a broad scale. Visit my portfolio to learn more about me and my projects.
